

List Active Directory Users In Groups

```
$Members = @()

$domains = (Get-ADForest).domains

foreach ($domain in $domains) {

$Groups = Get-ADGroup -Filter { Name -like "Enterprise Admins" } -Server $domain | Get-ADGroupMember -Server $domain

$Members += $Groups

}

$Members | Export-CSV -Path C:\Temp\Admins.csv -NoTypeInfoation
```

Local Computer Users

```
Net localgroup administrators
```

Must use [ActiveRoles Management Shell for Active Directory](#)

```
get-qadmemberof -indirect "GROUPNAME" -sizelimit 0 | Select-Object Name | ConvertTo-Csv -NoTypeInfoation | Out-File c:\temp\users.csv
```
