

Create .M3U Playlist From .CHD Files (Windows)

[m3umaker.ps1](#)

```
# Get the current directory
$folderPath = Get-Location

# Remove existing .m3u files in the current directory
Get-ChildItem -Path $folderPath -Filter *.m3u | Remove-Item -Force

# Get all .chd files in the current directory
$chdFiles = Get-ChildItem -Path $folderPath -Filter *.chd

# Group .chd files by base name (without the disc part and extension)
$groupedFiles = $chdFiles | Group-Object { $_.BaseName -replace '\s+\(Disc\s+\d+\)$', '' }

foreach ($group in $groupedFiles) {
    # Determine the .m3u file name (without disc number and extension)
    $m3uFileName = Join-Path $folderPath ($group.Name + ".m3u")

    # Create or overwrite the .m3u file and write each .chd file name to it
    $group.Group | ForEach-Object {Add-Content -Path $m3uFileName -Value $_.Name}}
```
