

Disable IPv6

1. Edit the Grub config.

```
sudo nano /etc/default/grub
```

2. Append/edit the following line.

```
GRUB_CMDLINE_LINUX_DEFAULT="ipv6.disable=1 quiet" GRUB_CMDLINE_LINUX="ipv6.disable=1"
```

3. Update Grub.

```
sudo update-grub
```

4. Reboot for the changes to take effect immediately.

```
sudo reboot now
```
