# Team Missing From Teams Admin Center

## Cause:

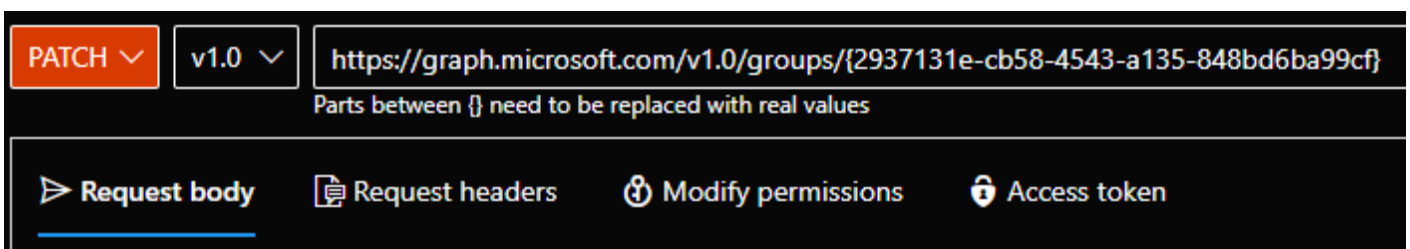

An attribute on the underlying modern group isn't correctly populated.

Replace {groupid} in the Query for the actual GroupId in question, which you can get via the Exchange Online powershell, with the "Get-UnifiedGroup" cmdlet, as the "ExternalDirectoryObjectId" attribute or by looking the group up within Entra.

1. Access [Graph Explorer](#)
2. Sign in to Graph Explorer on the top right-hand side menu:

3. Change the query line to: PATCH > v1.0 > <https://graph.microsoft.com/v1.0/groups/{groupid}>

4. Click the Modify Permissions tab and consent to any permissions required (you do not need to consent for the whole organization).

PATCH v1.0 https://graph.microsoft.com/v1.0/groups/{2937131e-cb58-4543-a135-848bd6ba99cf} Run query

Parts between {} need to be replaced with real values

Request body Request headers **Modify permissions** Access token

Permissions

One of the following permissions is required to run the query. If possible, consent to the least privileged permission.

| Permission              | Description   | Admin consent required | Status    | Consent type |
|-------------------------|---|------------------------|-----------|--------------|
| Group.ReadWrite.All     | Allows the app to create groups and read all group properties and memberships on your behalf. Additionally allows the app to manage your groups and to update group content for groups you are a member of. | Yes                    | Consent   |              |
| Directory.ReadWrite.All | Allows the app to read and write data in your organization's directory, such as other users, groups. It does not allow the app to delete users or groups, or reset user passwords.                          | Yes                    | Unconsent | Principal    |

5. Add the following value on the request body: {"resourceProvisioningOptions": ["Team"]}

PATCH v1.0 https://graph.microsoft.com/v1.0/groups/{2937131e-cb58-4543-a135-848bd6ba99cf} Run query

Parts between {} need to be replaced with real values

Request body **Request headers** Modify permissions Access token

```

{"resourceProvisioningOptions": ["Team"]}

```

6. Confirm you receive a 204 response in the middle of the page.

PATCH v1.0 https://graph.microsoft.com/v1.0/groups/{2937131e-cb58-4543-a135-848bd6ba99cf} Run query

Parts between {} need to be replaced with real values

Request body **Request headers** Modify permissions Access token

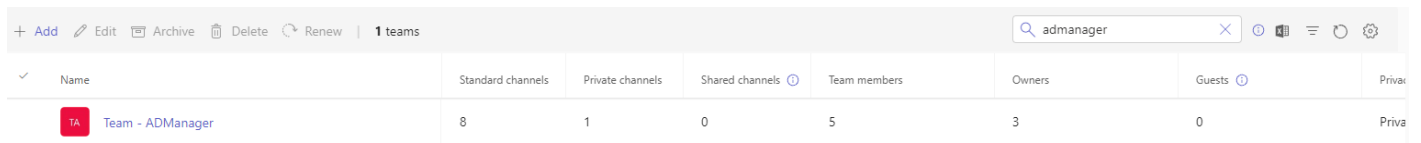

```

{
  "resourceProvisioningOptions": [
    "Team"
  ]
}

```

✔ No Content - 204 - 286 ms

## 7. Confirm the team appears correctly back on the Skype & Teams Admin Center - Team Overview.

The screenshot displays the 'Team Overview' section of the Skype & Teams Admin Center. At the top, there is a navigation bar with options: '+ Add', 'Edit', 'Archive', 'Delete', and 'Renew', followed by '1 teams'. A search bar contains the text 'admanager'. Below the navigation bar is a table with the following columns: Name, Standard channels, Private channels, Shared channels, Team members, Owners, Guests, and Privacy. The table contains one row for the team 'Team - ADManager'.

| Name   | Standard channels | Private channels | Shared channels | Team members | Owners | Guests | Privacy |
|--|-------------------|------------------|-----------------|--------------|--------|--------|---------|
|  Team - ADManager | 8                 | 1                | 0               | 5            | 3      | 0      | Private |
