

Overview

- [Network Diagram](#)
- [Docker Applications](#)
- [Current Server Rack](#)

Network Diagram

Using Active Directory for primary authentication with Azure AD sync for SSO and authentication with cloud apps.

Domain hosted by Cloudflare and proxies all web traffic through their network using Azure SSO for authentication.

M365 utilized for mail and mail security, as well as Sharepoint/OneDrive/Teams/Intune.

Docker Applications

Current Applications Running on Docker Hosts
