

List all Permissions in Share Recursively

```
Get-childitem \\network\share\ -recurse | Where-Object{$_ .psiscontainer} |  
Get-Acl | ForEach-Object {  
    $path = $_.Path  
    $_.Access | ForEach-Object {  
        New-Object PSObject -Property @{  
            Folder = $path.Replace("Microsoft.PowerShell.Core\FileSystem:", "")  
            Access = $_.FileSystemRights  
            Control = $_.AccessControlType  
            User = $_.IdentityReference  
            Inheritance = $_.IsInherited  
        }  
    }  
} | select-object -Property User, Access, Folder | export-csv output.csv -force
```
